

BPHH Risk Audit

Are you fully protected against vehicle loss?

01 Vehicle Location Visibility

HIGH RISK

- Can you view every financed unit on a live map right now?
- Do you have GPS on every vehicle — not just high-value ones?
- Are you alerted immediately when a device goes offline?

Most dealers: 1 of 3

02 Missed Payment Response Speed

CRITICAL RISK

- Do collectors see vehicle location before making their first call?
- Can you confirm location within hours — not days — of a miss?
- Do you have a written kill switch activation policy in place?

Most dealers: 0–1 of 3

03 Usage and Risk Behavior Tracking

MEDIUM RISK

- Can you pull mileage reports across your full portfolio on demand?
- Do high-risk accounts have geofencing enabled?
- Are unusual movement patterns flagged automatically?

Most dealers: 1–2 of 3

04 Tracking and Recovery Process

PROCESS GAP

- Is GPS integrated directly into your collections workflow?
- Do all financed units have active, reporting devices?
- Is your recovery posture proactive — not reactive?

Most dealers: 1 of 3

Score under 9? Your portfolio has gaps.
